

Giving Garrett Hope

Dr. Leo Kanner first described autism in 1943.
Autism affects the areas of the brain controlling language, social interaction,
and creative and abstract thinking.
Children and adults typically have deficiencies in verbal
and non-verbal communications and social interactions.

Families, friends, and communities coming together to
encourage, empower, and enrich a little boys quality of life
with the help of Wilderwood Service Dogs and your
donation.

We can give hope and support for a better life.

- **Increase independence and level of functioning.**
- **Provide stress reduction and break social barriers**
- **Maintain a safe environment**

You can make donations at First State Community
Bank in Farmington.

Thank you,
Garrett
